Zürich, October 23rd 1967/ko

Mrs. Hilda Marlin  
3107 Garfield Street NW  
Washington D.C.  
U.S.A.

My dear Hilda,

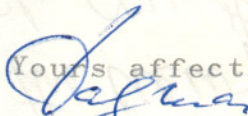

Reading the first part of your letter I thought that you were most probably allergic to salt which very often is seen in our medical experience especially on people that live from natural most vegetarian food. Salt is given in much too high doses in our days. Surely this may be combined with an allergy to eggs, milk, cheese, meat, coffee, alcoholics and also fruits, especially citrus-fruits sprayed with insecticides.

The ingredients of the health bouillon do not seem striking and no reasons to allergy - but God knows what artificial additions are put into all these industrialized food stuffs!

*So glad you say in the end of your letter is very cleverly thought!*  
If you like read the WENDEPUNKT Nr. 7/1967 on salt, it is most instructive. *(H. Kan)*

Hoping you feel better soon, I am

Yours affectionately,

D. Liechti, M.D.  
Chief Physician
